Liquid Health™ K9 Joint The Finest Ingredients

Glucosamine Hcl & Glucosamine Sulfate:

Provides the building blocks for healthy connective tissues in the body. Derived from shellfish, Liquid Health™ uses only USP grade Glucosamine in all of its products.

GreenGrown™ 100% Vegetarian Glucosamine is produced from a unique fermentation process, with further purification to meet the highest USP levels of purity. GreenGrown™ Glucosamine is also Kosher certified, NON GMO, and environmentally friendly.

Chondroitin Sulfate: Used for its synergistic properties in maintaining joint flexibility when used with correct amounts of Glucosamine. Liquid Health™ uses only USP grade Chondroitin Sulfate. Due to its high costs, many companies use lower quality Chondroitin Sulfate verified by older testing methods to achieve higher profit margins. Liquid Health™ takes the quality of Chondroitin very seriously and sets its quality standards a notch above the industry standard by only using NSF® certified Chondroitin Sulfate.

HA (Hyaluronic Acid): HA is composed of D-Glucuronic Acid and N-acetyl D-Glucosamine and is found in both the extracellular and intracellular matrix, especially in soft connective tissues. HA is the primary constituent of synovial fluid (joint lubricant) found in all joints.

Products Use Only Nature Provides:

Opti-MSM® is the only MSM manufactured in the USA. It is non-toxic, non-allergenic, and always 99.9% pure. While some manufacturers of MSM use a crystallization manufacturing method, Opti-MSM® is distilled to assure its unsurpassed purity. Evidence also suggests that Opti-MSM® may be beneficial in exercise recovery.

Manganese Chelate: Manganese is a mineral necessary for the synthesis of bone, and the formation of cartilage and synovial (lubricating) fluid in joints. Liquid Health™ uses a patented form of organic, chelated manganese. Chelated organic forms of inorganic mineral elements substantially increase the probability that the digesting organism will absorb the mineral for its use and benefit.

Harvested from a sustainable source off the coast of Iceland, Aquamin is a seaweed-derived mineral source. Aquamin is rich in calcium, magnesium and 74 other trace minerals including zinc, iron and selenium. It has been studied for its positive effects on both joint and bone health.

Hip And Joint Afflictions Are Among The Most Common Problems That Dogs And Cats Of All Breeds Experience

Current anti-inflammatory drugs can temporarily reduce the clinical signs of inflammation and pain in arthritic joints, but have not been shown to help in the regenerative process. Liquid Health™ Hip & Joint products offer powerful combinations of patented joint support ingredients that work synergistically to naturally help, protect, and optimize your pet's own maintenance and self-repair process.

Liquid Health Hip and Joint products:

- Help support healthy joint function
- Help support joint flexibility
- Help maintain joint mobility
- Contain Glucosamine, an easily absorbed natural substance, that may stimulate the production of proteoglycans, which in turn help maintain the health and resiliency of joints and connective tissue
- Contain antioxidants that help remove damaging free radicals
- Are in liquid form for easy administration and maximum absorption
- Are designed to improve your pet's health with Mother Nature in mind!

LIQUID HEALTH DROPS

SMALL DOG JOINT FORMULA

Organic beef flavor.

Recommended for small dogs 20 lbs. and under

Which Liquid Health™ Joint Product Is Best For My Pets?

K9 GLUCOSAMINE

The original liquid hip and joint supplement for dogs has a new and improved formula made even better with the addition of Hyaluronic Acid!

Recommended for use with all breeds of all sizes.

How much Chondroitin does your current joint product have? Due to its high cost, most joint products contain either low quality or inadequate amounts of Chondroitin Sulfate. Only Liquid Health™ K9 Glucosamine contains the clinically studied and recommended amounts of 1500 mg USP grade Glucosamine and 1200 mg USP grade Chondroitin.

PRODUCT FACTS	
Active Ingredients per Fluid Ounce	
Glucosamine Hcl (shellfish)	1600 mg
Chondroitin Sulfate (beef and/or porcine)	1200 mg
MSM (Methyl-sulfonylmethane 99.9%)	1000 mg
Manganese Chelate	7 mg
Hyaluronic Acid (as Sodium Hyaluronate)	10 mg
Inactive ingredients - 100% Pure Aloe Vera Juice, Citric Acid, Potassium Sorbate, Purified Water, Sodium Benzoate, Vegetable Glycerin	

K9 VEGETARIAN GLUCOSAMINE

100% Vegetarian Ingredients

Recommended for any dog with common allergies including those from animal based ingredients such as beef or shellfish.

K9 Vegetarian Glucosamine replaces Chondroitin Sulfate (only available from animal sources) with USP grade Glucosamine derived from vegetable sources and is supported with minerals, omega fatty acids, and antioxidants to provide a full spectrum of beneficial joint ingredients.

Hyaluronic Acid (as Sodium Hyaluronate)	100 mg
Joint PLUS (Proprietary Blend)	
Aquamin® Red Algae mineral blend (Lithothamnion Calcareum), Bromelain, Boswellia Serreta, Grape Seed Extract	1400 mg
Inactive ingredients - Citric Acid, Natural Flavoring, Potassium Sorbate, Purified Water, Stevia Leaf Extract (Rebaudioside-A), Vegetable Glycerin USP, Xanthan Gum	

Small Dog Joint Formula contains top joint support ingredients in a 2-oz dropper bottle for easy administration. Your dog will love the delicious flavor!

PRODUCT FACTS	
Active Ingredients Per 2 ml	
Glucosamine Hcl (USP) (corn)	260 mg
MSM (Methyl-sulfonylmethane 99.9%)	120 mg
Chondroitin Sulfate (USP) (beef)	50 mg
Ascorbic Acid (vitamin C) USP (preservative)	50 mg
Sodium Hyaluronate (Hyaluronic acid)	10 mg
Manganese (Chelate)	1 mg
Inactive Ingredients: Beef liver powder, Citric acid, Organic beef flavor, Purified water, Potassium sorbate, Vegetable glycerin (USP), Xanthan gum	

JOINT PURR-FECTION

Organic beef flavor.

Recommended for cats of all sizes and breeds

Specially formulated for improving joint health in felines, Joint Purr-Fection contains all the high quality ingredients found in Liquid Health™ Small Dog Joint Formula with the added benefit of the essential amino acid, Taurine. Because cats secrete Taurine through bile acids, supplementing this important amino acid through food or supplements is especially important for maintaining a cats overall health.

PRODUCT FACTS	
Active Ingredients Per 2 ml	
Glucosamine Hcl (USP) (corn)	260 mg
MSM (Methyl-sulfonylmethane 99.9%)	120 mg
Taurine	100 mg
Chondroitin Sulfate (USP) (beef)	50 mg
Ascorbic Acid (vitamin C) USP (preservative)	50 mg
Sodium Hyaluronate (Hyaluronic acid)	10 mg
Manganese (Chelate)	1 mg
Inactive Ingredients: Beef liver powder, Citric acid, Organic beef flavor, Purified water, Potassium sorbate, Vegetable glycerin (USP), Xanthan gum	

Liquid Health™ has been at the forefront of animal nutrition since 1999, and

human nutrition since 1992. First developed for people, our original K9 Glucosamine with Chondroitin and MSM is still one of the most trusted and effective animal supplements on the market. We are committed not only to quality pet products, but to pets and their owners as well.

Liquid Health™ Commitment to Quality and the Environment

Liquid Health™ uses ingredients from natural sources whenever possible. Since people and animals are a part of nature, shouldn't the things we put into our body be natural too?

All Liquid Health™ products are produced under strict quality parameters. No product is released for distribution until it has passed a strict set of standards and is tested in our in-house lab by our quality control department.

NASC

Liquid Health™ has received an "A" grade from NASC (National Animal Supplement Council) for the quality of its pet supplements.

The NASC Quality Seal is a way for consumers to know that when they buy a product displaying the NASC seal, they are buying from a reputable company that has successfully completed an independent quality audit. NASC Member Companies adhere to the following requirements:

- Registration of products in the NASC Adverse Event Reporting System
- Proper Label Guidelines
- Written comprehensive Quality Control Manual
- Recommendations from NASC's Scientific Advisory Committee
- Random product testing
- Compliance with Current Good Manufacturing Processes (cGMP)
