

High Performance Supplements For Horses

MADE
IN THE
USA

www.liquidhealthpets.com

Liquid Health™ Hip and Joint products:

- Help support healthy joint function
- Help support joint flexibility
- Help maintain joint mobility
- Contain Glucosamine, an easily absorbed natural substance, that may stimulate the production of proteoglycans, which in turn help maintain the health and resiliency of joints and connective tissue
- Contain antioxidants that help remove damaging free radicals
- Are in liquid form for easy administration and maximum absorption
- Are designed to improve your horse's health with Mother Nature in mind!

Liquid Health™ Joint Products Use Only The Finest Ingredients Nature Provides:

OptMSM®

Opti-MSM® is the only MSM manufactured in the USA. It is non-toxic, non-allergenic, and always 99.9% pure. While some manufacturers of MSM use a crystallization manufacturing method, Opti-MSM® is distilled to assure its unsurpassed purity. Evidence also suggests that Opti-MSM® may be beneficial in exercise recovery. OptiMSM® is a registered trademark of Bergstrom Nutrition.

Glucosamine Hcl & Glucosamine Sulfate: Provides the building blocks for healthy connective tissues in the body. Derived from shellfish, Liquid Health™ uses only USP grade Glucosamine in all of its products.

Manganese Chelate: Manganese is a mineral necessary for the synthesis of bone, and the formation of cartilage and synovial (lubricating) fluid in joints. Liquid Health™ uses a patented form of organic, chelated manganese. Chelated organic forms of inorganic mineral elements substantially increase the probability that the digesting organism will absorb the mineral for its use and benefit.

Aquamín

Harvested from a sustainable source off the coast of Iceland, Aquamin is a seaweed-derived mineral source. Aquamin is rich in calcium, magnesium and 74 other trace minerals including zinc, iron and selenium. It has been studied for its positive effects on both joint and bone health. Aquamin® is a registered trademark of Marigot Limited.

Chondroitin Sulfate: Used for its synergistic properties in maintaining joint flexibility when used with correct amounts of Glucosamine. Liquid Health™ uses only USP grade Chondroitin Sulfate. Due to its high costs, many companies use lower quality Chondroitin Sulfate verified by older testing methods to achieve higher profit margins. Liquid Health™ takes the quality of Chondroitin very seriously and sets its quality standards a notch above the industry standard by only using NSF® certified Chondroitin Sulfate.

HA (Hyaluronic Acid): HA is composed of D-Glucuronic Acid and N-acetyl D-Glucosamine and is found in both the extracellular and intracellular matrix, especially in soft connective tissues. HA is the primary constituent of synovial fluid (joint lubricant) found in all joints.

Which Liquid Health™ Joint Product Is Best For My Horse?

EQUINE 4ⁱⁿ1

How much Chondroitin does your current joint product have? Due to its high cost, most joint products contain either low quality or inadequate amounts of Chondroitin sulfate. Only Liquid Health™ Equine 4 in 1 contains the clinically studied and recommended amounts of 1500 mg USP grade Glucosamine and 1200 mg USP grade Chondroitin.

PRODUCT FACTS

Active Ingredients per Fluid Ounce

Glucosamine Hcl (shellfish)	1600 mg
Chondroitin Sulfate (beef and/or porcine) ...	1200 mg
MSM (Methyl-sulfonylmethane 99.9%)	1500 mg
Manganese Chelate	7 mg
Sodium Hyaluronate	25 mg

Inactive ingredients - 100% Pure Aloe Vera Juice, Citric Acid, Potassium Sorbate, Purified Water, Sodium Benzoate, Vegetable Glycerin

Available in 32 oz. & Gallons

Current anti-inflammatory drugs can temporarily reduce the clinical signs of inflammation and pain in arthritic joints, but have not been shown to help in the regenerative process. Liquid Health™ Hip & Joint products offer powerful combinations of patented joint support ingredients that work synergistically to naturally help, protect, and optimize your horse's own maintenance and self-repair process.

Liquid Health™ Commitment to Quality and the Environment

Liquid Health™ uses ingredients from natural sources whenever possible. Since people and animals are a part of nature, shouldn't the things we put into our body be natural too?

All Liquid Health™ products are produced under strict quality parameters. No product is released for distribution until it has passed a strict set of standards and is tested in our in-house lab by our quality control department.

NASC

The NASC Quality Seal is a way for consumers to know that when they buy a product displaying the NASC seal, they are buying from a reputable company that has successfully completed an independent quality audit. NASC

Member Companies adhere to the following requirements:

- Registration of products in the NASC Adverse Event Reporting System
- Proper Label Guidelines
- Written comprehensive Quality Control Manual
- Recommendations from NASC's Scientific Advisory Committee
- Random product testing
- Compliance with Current Good Manufacturing Processes (cGMP)
