THESE STATEMENTS HAVE NOT BEEN EVALUATED BY THE FDA. THIS PRODUCT IS A DIETARY SUPPLEMENT AND IS NOT INTENDED TO DIAGNOSE, TREAT, CURE, OR PREVENT ANY DISEASE.

LIQUID HEALTH™ is an NSF cGMP Manufacturer.

NSF stands for National Safety Foundation (It is now called NSF International). NSF is a non-profit, non-governmental organization that develops standards and rigorous criteria to help companies to operate not only within the bounds of the 21 CFR 111 (the regulation from the FDA regarding manufacturing of dietary supplements) but **well beyond what is required by the FDA**.

Health Supplements and Dietary Supplements with the NSF mark have been tested for safety from contaminants and are regulated for manufacturing consistency and accuracy. NSF certification for manufacturers means that a company has undergone strict review for quality, consistency, and accuracy in their manufacturing processes.

GMP stands for Good Manufacturing Practices. GMP's are a set of rules and guidelines set forth by the FDA in a mandate called 21 CFR 111. In order for a manufacturer to be able to continue to manufacture products in the United States they must comply with the good manufacturing practices mandated by the FDA in 21 CFR 111. cGMP simply means current good manufacturing practices.

Essentially cGMP compliance is another step of quality that a company goes through voluntarily to show their commitment to the cGMP's and also to making safe, consistent, and quality products.

Prebiotic & Ayurvedic Support

IMMUNE BALANCE 365

Every Day Immune Support Supplement

n a t u r a l
DAILY DEFENSE
 For Your Body

DESIGNED FOR DAILY USE

People get sick 365 days a year, not just in winter. Most immune products are designed to be taken for a short period of time or only after you get sick. Immune Balance 365 provides safe, year round immune system support.

ANATOMY OF A BETTER IMMUNE PRODUCT

Stress Relief and Cortisol Reduction

Stress Is A Killer!

Some studies indicate chronic stress as a more harmful factor than cigarette smoking in terms of overall wellbeing. Stress causes the body to produce too much cortisol. Too much cortisol can contribute to weakened immune response, belly fat, fatigue, and longer recovery times for illness. Studies of **Sensoril®** ashwagandha, contained in Immune Balance 365, demonstrated a 69% reduction in perceived stress and 24% reduction in serum cortisol.

SERUM CORTISOL

PERCEIVED STRESS
69%

Advanced Immunomodulators

Immune Boost or Immune Balance?

Boosting the immune system can be more harmful than helpful. Providing Immunomodulators (such as **Maitake Gold® 404** found in **Wellbody 365™**) and Elderberry rather than boosters (such as Echinacea) are designed to support both the innate and adaptive immune response without causing an overactive immune reaction.

Adaptogenic Disease Resistance

Adaptogens

Rhodiola Rosea, Eleuthero, and Ashwagandha are herbs called "adaptogens" because they are natural substances that enhance the body's resistance to outside stressors, including: fatigue, mental stress, germs, and anxiety. Adaptogens play a major factor in helping the body maintain healthy barriers and a "ready to go" immune system response.

Bioavailable Antioxidants

Free Radical Antioxidant Support

Every second of our lives billions of free radicals from radioactive material, ultraviolet rays, and industrial pollution wage war in our bodies. This seriously compromises the immune system, which threatens our vitality. Immune Balance 365 provides natural antioxidant vitamins C, D, & E to combat free radicals on a daily basis. Aloe vera Juice is added to improve the body's absorption of these essential nutrients.

Intestinal Health / Digestive Support

Maintain A Healthy Digestive System

Antibiotics are often inappropriately prescribed for viral illness, which can lead to antibiotic resistance and destruction of the normal flora or healthy bacteria in the intestinal tract. **NutraFlora®**, a prebiotic fiber, helps to maintain a strong immune system by building a healthy lower intestinal tract, enhancing the absorption of nutrients and helps to maintain proper digestion. By properly supporting the growth of probiotic bacteria in the gut, **NutraFlora®** also helps to reduce the number of pathogenic bacteria.
